Mint Conversion Information

As your financial institution completes its system conversion, Mint aggregation services may be interrupted for up to 5 business days. Mint.com data is stored on Intuit cloud servers. Data is updated with every change and cannot restore data to a previous point in time.

For a successful account update, do not log into your Mint.com between October 7 and October 14, 2022.

During this time, the Mint.com server will automatically make the system conversion for your activated accounts. If you login into Mint.com during this time, you may see duplicate accounts or an error displayed. Please do not attempt to change the status or make any changes in Mint.com during this time. After October 14, the accounts should reconcile showing your available transaction history.

In the event that your accounts do not display current transactions after October 14, you may log back into Mint.com and click refresh  to update the account. After the download completes, click the Transactions tab to view up to 90 days of transaction history.
